SafeStep®

8300 MAG CHLORIDE ICE MELTER

A DISTINCT COMPETITIVE ADVANTAGE.

One of the fastest-acting, premium ice melters on the market, Safe Step® Mag Chloride 8300® works in extremely cold temperatures. The unique crystal shape provides rapid ice penetration and prevents product from scattering where you don't need it. Safe Step Mag Chloride 8300 is 100% magnesium chloride hexahydrate, which means it is gentler for vegetation and concrete.*

Key features

- Melts ice to -15°F (-26°C)
- Safer for people, pets, lawns and concrete*
- Faster than other ice melters at melting ice and snow due to its unique hygroscopic action that quickly attracts moisture
- Doesn't blow or roll away like other ice melters that use a flake or pellet form — unique crystal shape helps it stay where you put it

Maximum performance

Safe Step Mag Chloride 8300 is specially formulated for maximum performance, melting ice quickly at extremely low temperatures.

Designated a "Safer Choice" by the U.S. EPA

Safe Step Mag Chloride 8300 has earned a Safer Choice designation from the United States Environmental Protection Agency (EPA), providing a product that is effective and safer for health and the environment.

* Compared to conventional ice melters, when used as directed
